Dear AgResearch,

In the last few days organizations and scientists have reported the latest encouraging research findings on the trials on the GE ryegrass.

1. Please can we also have a comprehensive copy of the results to date?
2. Also any unanticipated outcomes that may have been observed and tests results?
3. A copy of the genetic engineered traits that the grass was made with?

We are making this request under the OIA.

Sincerely

Jon Muller  
Secretary GE Free NZ (in Food and Environment)
